

OVERVIEW

CIBER's Enterprise Security Solutions

ciber[®]Secure[™]

CIBER's Enterprise Security Solutions (ESS) Practice can help you to identify security vulnerabilities to prepare for and prevent critical infrastructure security and technological threats.

Our CIBERSecureSM solution helps you bring together security and information technology into a single command and control system to simplify and streamline your operations.

CIBER's Enterprise Security Solutions Practice can provide the professional and technical resources and security and sensor integration specialties essential to your needs, regardless of your industry:

- Critical Infrastructure Protection
- Public Transportation Security
- Maritime Supply Chain Security
- Information and Infrastructure Security
- Emergency Management and Response Planning
- Technical Support Services

In today's world, the convergence of physical security solutions and Information Technology (IT) requires both security and IT Directors to manage far more information than ever before. In addition, ever-expanding security and technology options bring more advanced capabilities, but also require more expertise to implement, integrate and use. CIBER's Enterprise Security Solutions (ESS) Practice provides the expertise you need -- in IT, physical security, infrastructure management, software engineering, and system integration. With a decade of experience in designing and successfully delivering integrated security and situation management solutions, ESS has the experience, qualifications, and capabilities to help you fulfill your security mission.

We can assist you at every step in the process: from risk assessment, threat analysis, and penetration modeling, through solution design and implementation, and all the way on to sensor and data fusion through our CIBERSecureSM solution; CIBER ESS has the tools and talent you need to manage and protect your facilities, infrastructure, assets and people.

Vendor-Neutral Systems Integrator

CIBER is a vendor-neutral systems integrator, so we don't push products. Our goal is to provide the best solution for your needs, regardless of the product or vendor. We provide standards-based open systems to protect your investments while you grow your capabilities to meet new security needs -- without the restrictions that proprietary systems may impose.

Professional & Technical Resources

- Vulnerability & Risk Assessments
- Emergency & Response Planning
- Business Continuity / Recovery
- EOC "Con-Ops" Planning
- System & Software Integration
- Communications & Network Design
- System Design & Installation
- Command Center Design / Integration

- Intrusion Detection & Alarm Notification
- Mobile / Remote Video Solutions
- Sensor Detection Integration (CBRNE)
- Perimeter Fence, Gates, Barrier Systems
- Surface Radar Systems
- RFID, Asset Management, & Tracking

CIBERSecure

CIBERSecure is the most advanced security command and control solution available today. CIBERSecure allows you to bring your stove-piped systems together into a single “fused” platform. It integrates multiple systems, sensors, and applications into a single platform, delivering critical information and video directly to those who need it, whether they are local or remote. CIBERSecure delivers complete situational awareness. CIBERSecure can help you achieve your security goals with a security-based view of your enterprise.

Proven Solutions to Meet Your Needs

CIBER's Enterprise Security Solutions provides proven and reliable solutions that let you focus on your mission rather than on the technology supporting it. We provide full spectrum security solutions for Critical Infrastructure Protection, Public Transportation Security, Maritime and Supply Chain Security, Information and Infrastructure Security, Emergency Management and Response Planning, and Technical Support Services. No matter the security challenge you face – physical, operational, or IT – CIBER has the skills and experience to deliver systems and services at every critical stage.

Why CIBER Enterprise Security Solutions

ESS combines security engineering expertise with unmatched knowledge and understanding of information systems, technology and infrastructure to deliver security services and solutions to meet your specific requirements.

We adopt your mission as our own, providing solutions

and services to protect assets, people and critical infrastructures from potential risks. And should a risk become a reality, CIBERSecure provides coordinated communication and emergency command and control to respond effectively, efficiently and quickly.
